Re: Off-Site Rule Acceptability Determination
Advanced Environmental Technical Services
ILD 099 215 303

Dear Mr. Zarowny:

This letter is a correction to our July 20, 2005 letter to you regarding your request for off-site rule acceptability. In that letter we inadvertently limited your acceptability to non-hazardous waste which was not our intent. Please replace that letter with this one.

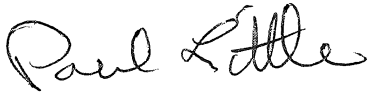

During the review of your facility, we determined that your facility consists of a few permitted and operating units and is undergoing permit modifications, design and construction for a number of other units. We made the decision to apply the results of the review only to the currently operating units. As additional units are permitted and constructed, you may request that these units be made acceptable.

Pursuant to 40 C.F.R. § 300.440 (b), my staff has determined that no relevant violations or releases currently exist at Advanced Environmental Technical Services. Therefore, Advanced Environmental Technical Services 13005 Hamlin Ct., Alsip, Illinois is acceptable to receive wastes from CERCLA sites at the units identified as the truck unloading / drum storage pads 1,2,3 and 5; tanks numbered 11, 12 and 13 and the Lab-Pack / Depack area in building number 1.

Please note that this determination is based on the available information at the time of the review. Your status could be changed any time relevant information becomes available according to the procedures in 40 C.F.R. § 300.440 (d). Generators who need to use a currently acceptable facility should verify the current acceptability of any facilities they wish to use with the appropriate Regional Off-Site Rule Coordinator(s).

If you have questions, please contact Mr. Damico at (312) 353-8207, United States Environmental Protection Agency, Region 5 – DE-9J, 77 W. Jackson Boulevard, Chicago, Illinois 60604.

Sincerely,

A handwritten signature in cursive script, appearing to read "Paul Little".

 Joseph M. Boyle, Chief
Enforcement and Compliance Assurance Branch
Waste, Pesticides and Toxics Division
